SUMMARY

Software Engineer with 1+ year of production experience building React, Next.js, and TypeScript applications integrated with REST APIs, including real-time WebSocket dashboards and a role-based CRM. Reduced a production bundle by 81% (70MB to 13MB) and improved load time from ~6s to ~4s. Currently expanding into backend development by building Python/FastAPI APIs at FloorWalk and a full-stack job tracking platform using FastAPI, PostgreSQL, SQLAlchemy, and Next.js.

SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Backend: FastAPI, SQLAlchemy 2.0, Pydantic v2, PostgreSQL, Alembic, REST API design, JWT authentication, Postman

Frontend: React.js, Next.js (App Router), Tailwind CSS, shadcn/ui, TanStack Query, Redux Toolkit, Context API, Axios

Architecture & Performance: Role-Based Access Control, caching, retry mechanisms, code splitting, lazy loading, tree shaking

Tools & Testing: Git, GitHub, React Testing Library, Chrome DevTools, Supabase

Deployment & Release: cPanel, WHM, Vercel, App Store Connect, Google Play Console, production deployments, app releases

EXPERIENCE

Frontend Developer | Aug 2025 - Present | FloorWalk Consultants Pvt. Ltd. | **Products:** FloorInsights, floor.estate CRM

- Reduced production bundle size by 81% (70MB to 13MB) through code splitting, tree shaking, dead-code elimination, and image optimization, improving load time from ~6s to ~4s.
- Currently building two backend APIs that retrieve report data from the database, send it to the Claude API for AI-generated analysis, and persist the results back to the database.
- Built a real-estate CRM in React/Next.js with role-based access control, lead management, broker workflows, property management, and follow-up automation; added a reusable API layer with caching, retries, and centralized error handling that reduced redundant network requests.
- Engineered real-time analytics dashboards using WebSockets; applied useMemo, useCallback, and selective rendering to eliminate unnecessary re-renders under high-frequency updates.
- Redesigned the client portal and Shopper app; worked on the auditor portal and the company and NPS websites (floorwalk.in, nps.floorwalk.in); delivered multilingual applications (8+ languages).
- Worked with backend engineers to integrate and troubleshoot REST APIs covering authentication, file uploads, and reports.
- Diagnosed rendering bottlenecks using Chrome DevTools and built reusable component architecture shared across multiple modules.

PROJECTS

TrackHire: Full-Stack Job Tracking Platform | Python, FastAPI, PostgreSQL, SQLAlchemy, React, Shadcn, REST APIs

- Designed a REST API with FastAPI and Pydantic v2 for job applications, candidates, companies, interviews, resumes, feedback, and activity tracking, backed by a normalized PostgreSQL database using SQLAlchemy 2.0
- Implemented JWT authentication with protected routes using FastAPI dependency injection and managed database schema changes through Alembic migrations.
- Built the Next.js client with TanStack Query, filtering, search, pagination, and real-time updates through Supabase Realtime.

Sanwariya Hotel — Freelance Web Developer | Live: <https://sanwariyahotel.com/>

- Built a production-ready hotel website with Next.js, React, TypeScript, Tailwind CSS, and shadcn/ui, delivering responsive hotel information, room/booking flows, and reusable UI components from client requirements.
- Implemented booking and inquiry forms that capture guest details and route submissions to WhatsApp for direct client follow-up; purchased and configured the custom domain and deployed the application on Vercel.

EDUCATION

B.Sc. Information Technology — Guru Nanak Dev University, Amritsar

Aug 2022 – Jun 2025
